Projects & Portfolio

Badil (Web-Based Bartering Platform)

Live link: <https://badil.best>

- Description: Designed, launched, and deployed a live full-stack web-based bartering platform.
- Key Responsibilities: Implemented full-stack architecture, handled user feedback, and conducted security testing.

Custom Business Utility & Invoice Management System

- Description: Developed a custom, full-stack web application designed to streamline business utility operations, track transactions, and manage invoicing efficiently.
- Key Responsibilities: Implemented full-stack architecture, designed the database structure for secure data management, and optimized user workflows for invoice generation and tracking.

Profile

Full-stack web developer with hands-on experience in building robust, responsive, and scalable web applications and SaaS platforms. Proficient in modern front-end and back-end technologies including React, Node.js, Express, and MongoDB, and problem-solving. Adept at creating custom utility solutions, secure databases, and user-friendly interfaces with a strong focus on clean code and performance optimization.

Skills

- ExpressJS
- ReactJS
- TailwindCSS
- MongoDB
- Responsive design
- RustAPI
